## A. Background

### A.1 Vocational Training System in India

Vocational Training is a concurrent subject under the Constitution. The Central and State Governments share responsibility for effective implementation of vocational training system in the country. At the national level, the Directorate General of Employment and Training (DGE&T), Ministry of Labour & Employment (MoLE), is the nodal body for formulating policies, laying down norms, standards, conducting trade test and certification of vocational training under the aegis of training advisory body National Council of Vocational Training (NCVT). The vocational training system under the Ministry of Labour and Employment is one of the most comprehensive systems in the country.

#### A.1.1 Institutional Training – Craftsmen Training through Industrial Training Institute (ITI)

The craftsman training is provided to youth with the objective to prepare semi-skilled workers for the industry. The educational qualification varies from class VIII pass to Class XII pass depending upon the trades. The duration of training varies from six months to three years. The trainees after completion of craftsmen training appear in the All India Trade Test to get National Trade Certificate awarded by National Council of Vocational Training (NCVT), which is recognized for the purpose of recruitment to the subordinate technical posts at the shop floor level within the country as well as abroad. The State Governments through Industrial Training Institutes/Industrial Training Centres (ITIs/ITCs) impart institutionalised vocational training under Craftsman Training Scheme, which is one of the flagship programmes run by the DGE&T.

#### A.1.2 On the Job Training – Apprenticeship Training through Industry

Another important training scheme of DGE&T is apprenticeship training imparted under the Apprentices Act, 1961 in industrial establishments to school leavers and ITI graduates with the objective to prepare skilled workers for the industry. The educational qualification varies from class VIII pass to Class XII pass depending upon the trades. The duration of training varies from one year to four years. All India Trade Tests for apprentices are conducted under the aegis of NCVT. Successful apprentices are awarded National Apprenticeship Certificate, which is a recognized qualification for recruitment to the shop floor level subordinate technical posts within the country as well as abroad.

#### A.1.3 Skill Development Initiative on Modular Employable Skill (MES)

Skill Development Initiative on Modular Employable Skill (MES) has been developed in close consultancy with Industry, State Governments & Experts in pursuance of excellence in vocational training. MES is 'Minimum Skill Set' which is sufficient to get an employment in the world of work. MES allows skills upgradation/formation, multi entry and exist, vertical and horizontal mobility and

lifelong learning opportunities in a flexible manner and allows recognition of prior learning. The skill is to be assessed by the Assessing Body mainly from the Industry organizations. NCVT issues certificate of skills acquired through informal means/competence assessed.

#### **A.1.4 Advisory Body – National Council of Vocational Training (NCVT) and Central Apprenticeship Council**

Two tripartite bodies—the Central Apprenticeship Council (a statutory body) and the National Council for Vocational Training (a non-statutory body) - advise the GOI on formulating policies and procedures, and prescribing standards and norms for vocational training schemes. Both bodies have representatives from the Central and State governments, employers organizations, workers organizations and vocational training experts. Correspondingly, State Councils advise the State governments in respect of vocational training at the State level.

The National Council for Vocational Training develops syllabi, affiliates ITIs, conducts All India Trade Tests (AITT) and issue certificates.

#### **A.2 Need for launch of Skill Development Initiative Scheme (SDIS)**

It is an established fact that, the skill level and educational attainment of the workforce determines the productivity as well as the ability to adapt to the changing industrial environment. A majority of Indian workforce does not possess marketable skills which is an impediment in getting decent employment and improving their economic condition. While India has large young population, only 10% of the Indian labour force - 8% informally and 2% formally have acquired vocational skills whereas the percentage in industrialized countries varies between 60% and 96%. About 63% of the school students drop out at different stages before reaching Class-X. Only about 3.1 million vocational training seats are available in the country whereas about 12.8 million persons enter the labour market every year. Even out of these training places, very few are available for early school dropouts. This signifies that a large number of school drop outs do not have access to skill development for improving their employability at one side and availability of 12.8 million jobs at the other side. A befitting reply is to provide skills and certificates to these school dropouts.

The educational entry requirements and long duration of courses of the formal training system are some of the impediments for a person of low educational attainment to acquire skills for his livelihood. Further, the largest share of new jobs in India is likely to come from the unorganized sector that employs up to 94 per cent of the national workforce, but most of the training programmes cater to the needs of the organized sector.

Ministry of Labour & Employment, considering it essential for early school leavers and existing workers, especially in the un-organised sector, their educational, social and economic background in skill development, developed a new strategic framework in close consultation with industry, micro enterprises in the un-organised sector, State Governments, experts and academia. Besides,

priority is also given to covering those above the age of 14 years who have been either engaged or withdrawn as child labour so as to enable them to learn employable skills in order to get gainful employment. Cluster approach has been adopted with a view to further reducing the incidence of child labour; parents of child labour could also be enrolled on a preferential basis for providing skills so as to improve their employability.

## **B. Features of the Scheme**

### **B.1 Objective**

The objectives of the scheme are:

- I. To provide vocational training to school leavers, existing workers, ITI graduates, etc. to improve their employability by optimally utilizing the infrastructure available in Govt., private institutions and the Industry. Existing skills of the persons can also be tested and certified under this scheme.
- II. To build capacity in the area of development of competency standards, course curricula, learning material and assessment standards in the country.

### **B.2 Key Features of the Scheme**

Key features of the scheme are:

- I. Demand driven short term training courses based on Modular Employable Skills (MES) identified and decided in consultation with Industry. MES is the 'Minimum Skills Set' which is sufficient for gainful employment or self employment in the world of work.
- II. Central government facilitates and promotes training while industry, private sector and state governments provide training to the persons
- III. Optimum utilisation of existing infrastructure available to make training cost effective..

- V. Different levels of programmes (foundation, skill formation and upgradation) to meet demands of various target groups of industry and commerce.
- VI. The services of existing or retired faculty or guest faculty are being utilized.
- VII. Courses are available for persons having completed 5th standard and onwards..
- VIII. Testing of skills of an individual acquired informally in competency and issue of NCVT certification on qualifying it successfully.
- IX. Testing of skills of trainees by independent assessing bodies, including industry organizations such as FICCI, CII, etc. which do not involve in training delivery, to ensure an impartial assessment by the employer itself.

- X. Essence of the scheme is in the certification on vocational training from the NCVT that is nationally and internationally recognized in world of work in the Government (Center and State) as well as private sector.

### **B.3 Public Private Partnership (PPP)**

Public Private Partnership (PPP) envisaged in the form of active participation of the industry / Private Sector in every stage of design and implementation of the scheme conceive and conceptualized by Government. Representation of Industry bodies in the “Central Apex Committee” a highest decision making body on SDIS at the center, State Committees on SDIS have overall responsibility of the scheme. It also tracks the trainees for three years or till they get gainfully employed. VTPs are required to have close networking with the industry for immediate placement of the trainees. VTPs have to maintain accounts, ensure proper utilisation of funds and submit reports and utilisation certificates as per prescribed schedule. VTPs follow various instructions issued by the committees or any other authority from time to time.

All VTPs have been given necessary powers to collect the training fee from trainees.
